

Horizon

Horizon is a complete hosted communications service that provides businesses with an extensive range of fixed telephony capabilities via an easy-to-use web portal.

Horizon takes the burden away from your IT team. We manage and configure the system according to your organisation's needs. Employees can then manage their calls easily and effectively, thereby maximising individual productivity.

Horizon offers a complete cloud communications system for your business, which easily gives control of your fixed and mobile telephony.

Horizon already has a host of great features and provides a business route towards true unified communications. You get new features, upgrades and optional integrations with third-party applications as soon as they are developed and released.

We provide everything from handsets to core network access, onsite installation, training and user guides, saving you time and hassle.

Connect multiple sites easily and cost-effectively with one system. Transfer calls to different locations seamlessly, integrate with your company CRM and corporate directory and implement call schedules in minutes.

Horizon offers your business a reliable phone system that can scale easily as you grow. We provide full support including training, number porting, provisioning and 24/7 UK-based assistance, giving you complete peace of mind.

With only a minimal capital outlay, it's a reliable and proven service with a jargon-free approach to telephony and cloud communications. By switching to Horizon you can immediately benefit from greater flexibility and a more cost-effective cloud phone service. Horizon can also help improve your organisation's productivity and customer service delivery with its clever features to help manage calls and enhanced reporting capability including wallboards.
